*Calculated at the financial year end, includes management fees and all other operating expenses, excludes performance fees.

**The Board has set the leverage limit for both the Gross and the Commitment basis at 130% of the Company's Net Asset Value.

***Active Share is expressed as a percentage and shows the extent to which a fund's holdings and their weightings differ from those of the fund's benchmark index. A fund that closely tracks its index might have a low Active Share of less than 20% and be considered passive, while a fund with an Active Share of 60% or higher is generally considered to be actively managed.

Investment Policy

In order to achieve its investment objective, the Company invests in a diversified portfolio of shares and related securities in biotechnology companies on a worldwide basis. The Company will not invest more than 15% of the value of its gross assets in any one individual stock at the time of acquisition. No more than 10% of gross assets will be invested in unquoted investments at the time of acquisition. This limit includes any investment or commitment to invest in private equity funds managed by OrbiMed or an affiliate thereof. Investments or commitments to invest in such private equity funds will be limited to US\$15m, after the deduction of proceeds of disposal and other returns of capital. The Company's borrowing policy is that borrowings will not exceed 20% of value of the Company's net assets. The Company may be unable to invest directly or efficiently in certain countries or share classes. In these circumstances, the Company may gain exposure by investing indirectly through swaps or other derivative instruments. Exposure to these financial instruments will count towards and be subject to the following limits: Derivative transactions (excluding equity swaps) can be used to mitigate risk and/or enhance return and will be restricted to an aggregate net exposure of 5% of the value of the gross assets measured at the time of the relevant transaction; Equity swaps may be used for efficient portfolio management purposes and aggregate net counterparty exposure through a combination of derivatives and equity swap transactions is restricted to 12% of the value of the gross assets of the Company at the time of the transaction.

Return vs Volatility (Annualised since Date of Appointment of OrbiMed) – Chart (%)

Commentary

In December, the NAV per share was down 8.8%, the share price was down 11.4% and the benchmark NASDAQ Biotechnology Index (net, total return, sterling adjusted) was down 5.6%.

Biotech underperformed the general markets in December. Policy uncertainty from the Trump administration and recent disappointing clinical results from a number of large biopharmaceutical companies, including Novo Nordisk and Vertex Pharmaceuticals, likely diminished generalist interest in the sector. The macro backdrop was also challenging. While the U.S. Federal Reserve (the “Fed”) cut interest rates by a quarter point in December, the Fed also said it anticipated fewer rate cuts in 2025 than investors were expecting given the continued strength of the U.S. economy. The Fed’s incrementally “hawkish” commentary and expectations that Trump’s expected tariffs could worsen inflation contributed to an increase in 10-year U.S. government yields by over 40 basis points in December. The rise in interest rates pressured share prices of the emerging biotech companies that make up a majority of the portfolio. We continue to see attractive valuations in the biotech sector and believe a stabilization of interest rates should be sufficient to allow the sector to recover.

XtalPi Holdings Limited, Neurocrine Biosciences, and Scholar Rock Holding Corp were the largest positive contributors to performance during the month. XtalPi appreciated in December on no fundamental news after it declined considerably in the prior month. Neurocrine’s stock price rose after the approval of Crenesity for congenital adrenal hyperplasia and announcement that the drug will be priced higher than investors anticipated. Scholar Rock’s stock made gains in December on no fundamental news.

Avidity Biosciences, BioAge Labs, and Dyne Therapeutics were the largest negative contributors to performance during the month. Avidity and Dyne declined in December, along with the biotech space, on no fundamental news. BioAge’s stock price declined after the company decided to discontinue its Phase 2 trial in obesity due to an elevated liver enzyme signal observed in the study.

Discount / Premium Control Mechanism

The Directors have adopted an active discount management policy to establish and support an improved rating in the Company’s shares through the use of share buybacks, with a view to limiting the discount to NAV per share at which the shares trade to no more than 6%. Shares bought back will be cancelled.

Risk Warnings

This document is for information purposes only and does not constitute an offer or invitation to purchase shares in the Company and has not been prepared in connection with any such offer or invitation. Before investing in the Company, or any other investment product, you should satisfy yourself as to its suitability and the risks involved, and you may wish to consult a financial adviser.

Any return you receive depends on future market performance and is uncertain. The Company does not seek any protection from future market performance so you could lose some or all of your investment. Shares of the Company are bought and sold on the London Stock Exchange (LSE). The price you pay or receive, like other listed shares, is determined by supply and demand and may be at a discount or premium to the underlying net asset value of the Company. Usually, at any given time, the price you pay for a share will be higher than the price you could sell it. For further information on the principal risks the Company is exposed to please refer to the Company's Annual Report or Investor Disclosure Document available at www.biotechgt.com. The Company can borrow to purchase investments, this could potentially magnify any losses or gains made by the Company.

Target Market

The Company is suitable for investors seeking an investment that aims to deliver total returns over the longer term (at least five years), is compatible with the needs for retail clients, professional clients and eligible counterparties, and is eligible for all distribution channels.

The Company may not be suitable for investors who are concerned about short-term volatility and performance, have low or no risk tolerance or are looking for capital protection, who are seeking a guaranteed or regular income, or a predictable return profile. The Company does not offer capital protection.

Value Assessment

Frostrow Capital LLP has conducted an annual Value Assessment on the Company in line with Financial Conduct Authority ("FCA") rules set out in the Consumer Duty regulation. The Assessment focuses on the nature of the product, including benefits received and its quality, limitations that are part of the product, expected total costs to clients and target market considerations.

Within this, the assessment considers quality of services, performance of the Company (against both benchmark and peers), total fees (including management fees and entry and exit fees as applicable to the Company), and also considers whether vulnerable consumers are able to receive fair value from the product.

Frostrow Capital LLP concluded that the Company is providing value based on the above assessment.

Important Information

The Biotech Growth Trust PLC is a public limited company whose shares are listed on the LSE and is registered with HMRC as an investment trust. The Company has an indeterminate life, although shareholders consider and vote on the continuation of the Company every five years (the next such vote will be held in 2025).

This financial promotion is issued by Frostrow Capital LLP which is authorised and regulated by the FCA.
